The Lands Between are a world in which several countries have been divided by the power struggle between a few countries. The elite knights battle to the death over the power and wealth of the lands between with an iron fist. During this period of peace, however, a great crisis has arisen in the depths of the "Lands Between", where a great wizard lived for over 100 years, surrounded by his wife and child. The power of his magic has been awakened, and he has requested aid from the "Elden Ring". The Elden Ring is a multilayered organization that controls the lands between, so this request has great significance for the entire Lands Between... The game takes place in an "Elden Ring" in the Lands Between. The powers that control the Elden Ring and the world that exists within it have been concealed from the common people, so the story takes place in secret, and the main character is hidden behind a veil of secrecy. There is no set story, and the story unfolds and progresses together with the actions of the player. The Lands Between is a world filled with secrets and mysteries that a player can unlock as they progress. In the game, for the first time, the "Elden Ring", which is a story of destruction and evil, and its story, can be taken on from the perspective of a hero who does not know the true character of the "Elden Ring". The freedom of interaction with the unknown lands, the development of the characters in response to the own imagination, and the unique story that is different from the story told in the books will all encourage the players to tell their own story

and think about the story. The player can come up with their own names for the heroes of the game, and develop a vast story that will be remembered by all players for a long time. ■ Characters and Storyline
Young Knight You will start the game as a young knight in the Lands Between, who follows his master on a secret mission. The master is secretly working to protect the world from the power of an evil organization known as "The Elden Ring", and you are to go on a mission as his knight. During this mission, you will meet a lot of people who have their own stories, and a lot of things that will affect your quest will come to light. The young knight will follow the instructions you receive from your master and work on a secret

XOne Gaming 60+ hours of gameplay In the RPG you'll first build up a home base, where you can visit from time to time, and later raise your warriors. The game is full of things you can do to it, and it will not be boring to you. You can play as a melee fighter, a range fighter, a mage, or a support class, each of them being different and covering a different set of skills. Each character has skills that can be upgraded up to four times per level and is very powerful with increasing levels. Attributes in the game affect your fighting and magic abilities. Similar to the Necromancer class in The Elder Scrolls series, any attribute that you add up to your maximum will become stronger, at the expense of weaker stat values. There are also six different races in the game: human, elf, drake, aboleth, golem, and elemental. Each of these races has a different affinity. For example, human warriors are better fighters, and drake warriors are better spell casters, but human mages tend to have the weakest amount of health points. These stats all affect your character's stats. With many skills and stats to improve, there is a great deal of depth to the game. It also features a typical black and white morality system. At one point, you have to choose between good and evil. If

you choose good, your character will always fight on the side of right. One of the main aspects of the game, however, is the damage. All damage in the game is done by using stats, and there are only five ways to damage other characters. There are two types of damage - melee and range damage. Melee damage comes from using an ability. A character will typically have a certain amount of health, attack, and defense. If your character attacks an enemy, a certain amount of damage will be dealt, determined by the attack and defense stats. This damage is split between the combatant and their weapon/armor. The damage done is based on the weapon skill or ability of the attacker. Range damage is done with a bow. You will need a certain amount of damage points to hit the enemy, again determined by the bow's skill. To use a bow, you will need to pull out a string, which will indicate when you have the perfect time to fire. Once the bow is drawn, you will attack and damage the target with the proper arrow skill. The combat system is similar to the dungeon crawler genre, and is responsive enough that bff6bb2d33
